- TESTED & APPROVED – Meets CPAI-84 flame resistance code.
- **Umbrella Stand and Trailer Hitch attachments included in combo package.**

The Hex-Hut Welding Umbrella provides fast and portable relief from the elements to increase worker productivity and reduce weather-related delays.

Engineered with a powder-coated steel frame, a reinforced weather-proof canopy and 300 denier polyester material, this lightweight umbrella is built to last. The unique tilt-top feature allows users to shade themselves from ultraviolet (UV) sun rays any hour of the day.

A vented lime top provides airflow and visibility, making this a great construction umbrella for those scorching hot jobsites. The polyester shell also has protective coatings (Polyurethane (PU) and UV) which provide the ultimate shelter from sun/UV, rain, and wind.
